HOBBIES

Gaming

Featured Projects

1. BC Wellness Web App (2025)

This is a Java desktop application for managing student wellness services at Belgium Campus. Built with Java Swing, JavaDB, and designed using OOP principles and MVC architecture, the system provides counselors, students, and administrators with tools to manage appointments, counselor details, and student feedback

2. StreetSync - Community Portal (2025)

Welcome to StreetSync, a community-driven web application built for racing enthusiasts. Whether you're a track-day pro or just getting started, this Node.js-based portal helps you stay informed about upcoming events and connect with the racing world.

3. Unity NLP Drone Controller (2025)

These scripts enable voice-controlled drone commands using natural language processing, allowing intuitive control through commands like "take off", "move left 50", or complex compound instructions.

EDUCATION

Wonderboom H/S
